CONNECTION CYCLE
GROUP

Offer sheet

Order-to-energization for electric cooperatives and municipal utilities.

November 2026. Fees in United States dollars. Suitable to forward as it stands.

Connection Cycle Group fixes the path from a new-service application to energization. Engagements are remote, asynchronous, and fixed in scope. We take one client at a time, beginning with utilities in Colorado and the Mountain West. Faster connections and hours returned to staff come first. Lower cost is the payoff.

ENGAGEMENT	FEE	TERM	DEPOSIT
Connection Cycle Diagnostic	$3,500	1 week	$1,750
Full Connection Cycle Audit	$7,500	2 weeks	$3,750

Diagnostic. $3,500. One week.

Measures where days are lost at each stage, using a recent sample of your orders. You get real numbers, a ranked list of where orders stall, and the top fixes.

Full audit. $7,500. Two weeks.

Adds a full cycle-time baseline, root causes for the main order types in your sample (for example new homes, commercial, solar/interconnection), and a sequenced 90-day fix roadmap with an owner for each step.

The Diagnostic fee is credited in full if the Audit is signed within 60 days. Half of either fee is the deposit.

How to buy

- Card: the Diagnostic deposit of $1,750, on the payment link at connectioncyclegroup.com. Balance on delivery.
- Invoice or purchase order: request on the site or by email. Half the fee reserves the next open start week.
- Board-approved contracts: we will state a fixed fee or a not-to-exceed amount.

Terms

- No retainer and no subscription. One client at a time.
- Remote and asynchronous. Staff time is about two to three hours.
- Half the fee to begin. The balance is due when the report is delivered.
- We sign your nondisclosure agreement before any files are sent.
- Advisory work. A written findings report is the deliverable. Results are not guaranteed.
